Calcium in Fruit Juice

Orion 4-Star pH/ISE
Benchtop Meter

Food & Beverage

The calcium content in fruit juices, such as apple juice, is measured in accordance with quality control and nutrition facts labeling requirements. The FDA sets the "percent Daily Value" (%DV) for calcium in fruit juice. The amount of calcium is listed on the Nutrition Facts panel on the container label.

The direct measurement of ions using Ion Selective Electrodes (ISE) is a well-established technique frequently used as a standard method of analysis in chemistry laboratories today.

Orion 4-Star pH/ISE for ISE measurement

Foods that provide calcium include milk, cheese, some leafy green vegetables, and fortified fruit juice. Calcium is vital for healthy teeth and bones and also plays a crucial role in a range of bodily systems, such as the healthy functioning of nerves and muscle tissue. The Food and Nutrition Board of the National Academy of Sciences recently released new national recommendations for calcium, raising the levels for most age groups.

Many manufacturers use Thermo products everyday for purposes of Research & Development, Quality Control and Product Labeling. Our meters, electrodes and

solutions help to ensure the accuracy of ingredient content. With the easy to use Orion 4-Star pH/ISE meter (Cat. No. 1115000) and Orion ionplus® Calcium electrode (Cat. No. 9720BNWP), pH and ISE measurements are fast and accurate. This rugged meter offers a full complement of GLP-related features and can store up to 10 set-up parameters and calibrations; a valuable feature for busy multi-user labs. Orion products offer top quality meter features with proven electrode technology to provide a complete package needed to measure calcium in fruit juice.

Orion 4-Star pH/ISE

The  with the Orion ionplus® Calcium electrode (Cat. No. 9720BNWP) offers an optimum solution to meet pH and ISE measurement needs.
